

```
Create table triplete(
tableID integer primary key,
fk_vertex1 varchar(255),
fk_vertex2 varchar(255),
edgelabel varchar(255),
foreign key(fk_vertex1) references vertex(name) initially deferred deferrable,
foreign key(fk_vertex2) references vertex(name) initially deferred deferrable);
```

```
create table vertex(
name varchar(255) primary key);
```

2. Thanks to Mark Fulbright whose solution I liked so much, I borrowed it.

Relational Expression
